Introduction

The Ontario Ministry of the Environment has the responsibility "to control the use of air, water and land to the degree necessary in order to protect, conserve, and improve the quality of the environment for the optimum well being of the people of Ontario". This bibliography with accompanying reference sources was prepared to assist students and teachers in obtaining further information on environmental topics.

In addition to this guide, the Educational Resources Section of the Information Services Branch of the Ministry distributes resource kits to both students and teachers at the elementary, secondary and post-secondary level. For a complete listing of the publications and assistance available, request a copy of the publications list and the folder "Environmental Education...It's a Whole New World".

Bibliography

The following books and articles have been categorized and listed according to subject material. Overlapping does occur, particularly in the list of books under the topic ENVIRONMENT. The books, for the most part, have been written since 1968. However, books written prior to that date and which remain current were also included.

AIR POLLUTION

Air Pollution

Stern, Arthur C., 1966, Academic Press, New York, N.Y.

Air Pollution Engineering Manual

Danielson, John, 1967, U.S. Public Health Service, Washington, D.C.

The Unclean Sky

Battan, Louis J., 1966, Fawcett Crest Book, Greenwich, Connecticut.

Your Right To Clean Air; A Manual For Citizen Action

1970, Report of the Conservation Foundation, Air Quality Advisory Committee, Washington, D.C.

ECOLOGY

Warning Signs In The Ecosystem

Dobson, Les, Ontario Hydro News (March 1970) Toronto, Ontario

Man's Impact On Terrestrial and Oceanic Ecosystems

Mathews, W.H., et al, 1972, M.I.T. Press, Cambridge, Mass.

Limnology

Welch, P.S., 1952, McGraw-Hill Company, New York, N.Y.

A Guide To The Study Of Freshwater Ecology

Andrews, W.A., 1972, Prentice Hall, Toronto, Ontario.

A Guide To The Study Of Freshwater Biology

Needham, J.G. & P.R. Needham, 1962, Holden-Day Inc., San Francisco.

Fundamentals of Limnology

Ruttner, F., 1963, University of Toronto Press, Toronto, Ontario.

Freshwater Fishes of Eastern Canada

(2nd Edition), Scott, W.B., 1967, University of Toronto Press, Toronto, Ontario.

Freshwater Invertebrates of the United States

Pennak, R.W., 1953, The Ronald Press Company, New York, N.Y.

Freshwater Ecology

Macan, T.T., 1963, John Wiley & Sons Inc., New York, N.Y.

A Field Guide To Reptiles And Amphibians

Conant, R., 1958, Houghton Mifflin Company, Boston, Mass.

Concepts of Ecology

Kormondy, Edward J., 1966, Prentice-Hall, Englewood Cliffs, N.J.

Ecology and Field Biology

Smith, R.L., 1966, Harper & Row, New York, N.Y.

PROVINCIAL RESPONSIBILITIES

Since provincial administrations are closer to the actual management scene, they are, in most cases, responsible for regulation legislation, local administration and planning the major role in pollution abatement and control.

FEDERAL RESPONSIBILITIES

The federal government (Environment Canada) has the authority to deal with pollution problems that spill over provincial and international boundaries. Together the federal and provincial government carry out co-operative programs.

The Great Lakes are of particular note here. Their management is a joint Canada/United States responsibility because of the international nature of the waters.

Environmental Films

The following agencies maintain libraries which contain excellent and modern environmental films. Due to the increasing demand for films on air, water, waste, noise and conservation, bookings must be made well in advance. In addition, most associations and industries, maintain limited film libraries but are very cooperative in distributing their films to interested audiences. Available topics relate directly to the association or industry involved.

Library Sources

Municipal and school libraries maintain excellent collections of books and articles on the environment. Particular reference should be made to new books as the majority of these are on environmental topics. Your librarian would be pleased to assist you.

The Ministry of the Environment also maintains a library for reference purposes. The library, located at 135 St. Clair Avenue West, is available for your research and is open 5 days a week from 8:30 to 4:30 p.m. In addition to the research reports of the Ministry of the Environment, the library maintains an excellent collection of journals, textbooks, annual reports and studies related to environmental quality.

Student Field Studies of Environmental Pollution

Students interested in carrying out field studies related to environmental pollution in the areas of air, water, land and noise should obtain copies of the following series of books.

Both series are written in Ontario for Ontario conditions, with experimental procedure and equipment needs well within the realm of individual study. Additional material and assistance is available from the Ministry of the Environment.

ELEMENTARY LEVEL:

Examining Your Environment, 1972

This series, particularly the two volumes *Running Water* and *Pollution* describe the equipment and methodology necessary for examining pollution. Written by D. Wentworth, Ken Couchman, J. MacBean and A. Stecher and published by Holt, Rinehart and Winston of Canada, Toronto, they are highly recommended.

SECONDARY LEVEL:

Contours 1972

This series of studies of the environment include (1) *A Guide to*

the Study of Environmental Pollution (2) *A Guide to the Study of Freshwater Ecology* (3) *A Guide to the Study of Soil Ecology* and (4) *A Guide to the Study of Terrestrial Ecology*. The series editor is William A. Andrews of the University of Toronto. Prentice-Hall of Canada Limited, Scarborough, Ontario is the publisher.
